

Miami-Dade County opens Tropical Park COVID-19 testing site 24 hours

The Tropical Park COVID-19 testing site has expanded its hours and is now open 24 hours a day for PCR testing. Currently, the County is averaging over 24,000 COVID-19 tests per day and Tropical Park is one of the sites with the highest demand. The new schedule will increase access to more community members during the school year, make it more convenient to those with demanding work schedules, and reduce wait times.
